

ExodusPoint Capital Management UK, LLP 2020 Best Execution Disclosure

ExodusPoint Capital Management UK, LLP (“ExodusPoint” or the “Firm”) is an investment firm authorised and regulated by the Financial Conduct Authority (“FCA”). The Firm is part of the ExodusPoint Management group, which is a global, multi-strategy investment firm that provides discretionary investment management services, and includes ExodusPoint Capital Management, LP (“ExodusPoint US”).

Commission Delegated Regulation 2017/576 (“RTS 28”) supplementing Article 27(6) of Directive 2014/65/EU on markets in financial instruments (“MiFID II”) requires investment firms who execute client orders to summarise and make public on an annual basis, for each class of financial instruments, the top five execution venues in terms of trading volumes where they executed client orders in the preceding year and information on the quality of execution obtained.

In tandem with the above, the Firm is also obligated to provide a summary of the analysis and conclusions made from the monitoring of its quality of execution obtained on execution venues for each class of financial instruments in the preceding year (the “Best Execution Summary”). This is contained within this disclosure.

Certain disclosure obligations as outlined in Article 3 of RTS 28 are not applicable to the Firm as it does not act on behalf of retail clients. Information provided by consolidated tape provider(s) has not been used by the Firm in its assessment of Best Execution.

The Firm has not included the following asset classes listed in RTS 28 as the Firm has not traded in these instruments during the reporting period:

- Debt instruments (ii) money markets instruments
- Credit Derivatives (i) futures and options admitted to trading on the trading venue
- Structured finance instruments
- Contracts for difference
- Emission allowances
- Other instruments

The attached annexes indicate for each class of financial instrument, as specified within MiFID II, the top 5 execution venues for (i) direct – execution of orders by the Firm directly as a member or participant of a trading venue, or with a systematic internaliser, market maker, liquidity provider, or direct counterparty (such as in OTC markets) and; (ii) indirect – transmission or placing of orders by the Firm with another investment firm for execution by the other firm (e.g. a broker).

The Firm was authorised by the FCA on 18 January 2019. This RTS 28 disclosure is based on the execution data and analysis gathered from 1 January 2020 to 31 December 2020 (the “RTS 28 Reporting Period”).

ExodusPoint Capital Management UK, LLP 2020: Best Execution Summary

As a FCA authorised investment manager, ExodusPoint is obliged to take all sufficient steps to obtain the best possible results for its clients taking into account various execution factors. Best execution refers to an investment manager’s obligation to execute securities transactions in a manner most favourable and beneficial for its clients under the circumstances. The aim is not to deliver the best possible result for each individual order but to assess transactions generally across a relevant period of time and to establish a process that seeks to deliver consistent best execution outcomes for its clients going forward.

Execution Factors (3(a) of Article 3 RTS 28)

Execution Factors may be used to assist the Firm with its selection of an execution venue or broker for client order execution and its order execution quality monitoring. Whilst the price offered by an execution venue or broker including commissions or commission equivalents and transaction costs is normally the main determinant, other factors may also be relevant. These include:

- Execution capability (speed and likelihood of execution);
- Willingness to commit capital;

- Creditworthiness and financial stability;
- Clearance and settlement capability;
- Ability to maintain confidentiality;
- Other relevant considerations to the execution of the order.

The relative importance that the Firm generally assigns to these execution factors in relation to the execution of client orders across the various different asset classes of financial instruments is summarised in the Annexes to this Report.

Numerous relationships with execution venues and brokers are established in order to obtain the best possible results across the full scope of the Firm's trading activities. Periodic reviews and monitoring of execution order quality will be used to inform these relationships in addition to the expansion of the business requirements to trade new instruments, or new markets, or geographies and/or their ability to source inventory or market flow. Likewise, decisions will be taken to terminate existing relationships with execution venues and brokers as a result of infrequent use, or execution order quality performance.

The Firm may pass certain of its client orders to ExodusPoint US or other affiliates based in different jurisdictions. The Firm will typically use these affiliates in connection with orders involving financial instruments in any asset class, traded on their local execution venues to leverage the affiliate's expertise and familiarity with such instruments, venues and local brokers. As such, some of our affiliates may appear in the top five list for certain asset classes as required by the disclosure rules.

Conflicts of Interest (3(b) of Article 3 RTS 28)

The Firm is not aware of any close links or common ownership issues between itself and/or its affiliates and the execution venues or brokers it uses to execute orders. Additionally it is not aware of any conflict of interest that exists between it or its affiliates and such executing venues or brokers that would impair its ability to obtain when executing orders, the best possible result for its clients. For completeness, the Firm has determined that it will pay for research directly from its own account.

Discounts, Rebates and Non-Monetary Benefits (3(c) of Article 3 RTS 28)

The Firm may receive volume based discounts with selected counterparties or exchanges, as is standard practice across the industry. These discounts are applied retrospectively at the end of a trading period and are not known by the Firm at the point of execution. Minor non-monetary benefits such as market commentary may be received by the Firm from its brokers and other counterparties in compliance with MiFID 2.

Data or tools used relating to the Quality of Execution (3(g) of Article 3 RTS 28)

The Firm does not currently use third party data or tools relating to the quality of execution, but may utilise these in future as they prove to be beneficial.

Monitoring

The Firm with assistance from its affiliates regularly review the effectiveness of its best execution obligation including the applicability to incorporate any changes to enhance the quality of execution obtained. As part of these reviews, counterparties were added and/or removed to ensure that the Firm continued to obtain the best possible result for its clients. Factors considered in this assessment included price, access to market, counterparty risk, market liquidity and overall service levels.

The Firm is satisfied that throughout the 2020 RTS 28 Reporting Period, it has taken all sufficient steps to meet its obligation to achieve best execution for its clients on a consistent basis.

In particular:

- the execution quality and performance received from brokers is in-line with expectations;
- it has maintained sufficient relationships with execution venues and brokers to service its trading activities, with appropriate consideration given to contingency; and where relevant
- the commission paid to brokers for their execution services was reasonable and in-line with standard market rates.

Non-Reliance

Please note that this document is not marketing or promotional material and has been prepared and published to ensure compliance with MiFID II disclosure requirements. Neither the Firm nor its affiliates guarantee the accuracy and/or completeness of this documentation and the data contained herein. This document has been prepared on a best endeavours basis in the context of the Firm's first year of operation. The information may be subject to change and no reliance should be placed on the output of this Report.
